

# MEMBERSHIP MANAGEMENT SYSTEM

[WWW.MEADWILLIS.COM](http://WWW.MEADWILLIS.COM)

Meade Willis' Membership Management system is a web-based portal that allows companies to track and manage their members and related business operations in a user-friendly way. The system enables companies to create, modify and/or delete member information. The solution also includes product details, purchase and activities history, as well as customizable reports that help companies identify and take advantage of valuable information.

Meade Willis' MMS is designed to meet the needs of any size company, helping them to effectively manage members' orders as well as members' profile information. The system's database stores member profiles and is used to generate comprehensive reports regarding member activity. This allows for easy analysis, and the export of information in different formats, such as Excel and PDF files.

## KEY FEATURES

### **Order Validations:**

Greater control of ordering processes using parameters such as minimum quantity, amount, etc.

### **Customizable Options:**

Generate reports with valuable information pulled from member orders. Customize screens, fields, and more.

### **Role Based Permissions:**

Strict control of the access level provided to different portal users.

### **Member & User Management:**

Keep the data current: add, delete or modify member and user information.

### **Product Management:**

Add, delete or modify products with different descriptions and access product availabilities.

### **Data Integrity and History:**

Access to detailed logs and activity history, including orders, restrictions, profile updates, etc.
