

# SYSTEMS INTEGRATIONS & DATA CONSOLIDATION

[WWW.MEADEWILLIS.COM](http://WWW.MEADEWILLIS.COM)

Meade Willis manages an extensive library of document format conversion programs in order to seamlessly integrate any process with both legacy and cutting edge systems. Universal Data Exchange allows multiple systems to communicate with each other as well as share validated information with and between data sources.

Any to Any Translation & Integration:

Document IN	Document OUT
EDI	Flat File
EDI	XML/CSV
Flat File	XML/CSV
Flat File	EDI
XML/CSV	EDI
XML/CSV	Flat File
Any	Any

## KEY FEATURES

- > Seamlessly send and receive information between data warehouses, disparate facilities & trading partners which may all require multiple or unique data formats
- > Receive electronic documents such as purchase orders and shipping schedules directly into sales order processing applications or ERP system databases, which are not equipped to handle EDI or non proprietary data formats
- > Send invoices and Advanced Shipment Notices (ASNs) directly from ERP & accounting systems to customers who require invoices and ASNs in their own EDI or unique system formats (flat file formats)
- > Automate business rules and processes of any business documents from any application, and integrate with any system or trading partner
