

MEADE WILLIS  
www.meadewillis.com

Meade Willis' cloud XRP Electronic Invoicing solution provides operational and strategic benefits from day one. Advanced functionality is delivered without the need of local hardware installation or lengthy/costly implementations.

## FEATURES:

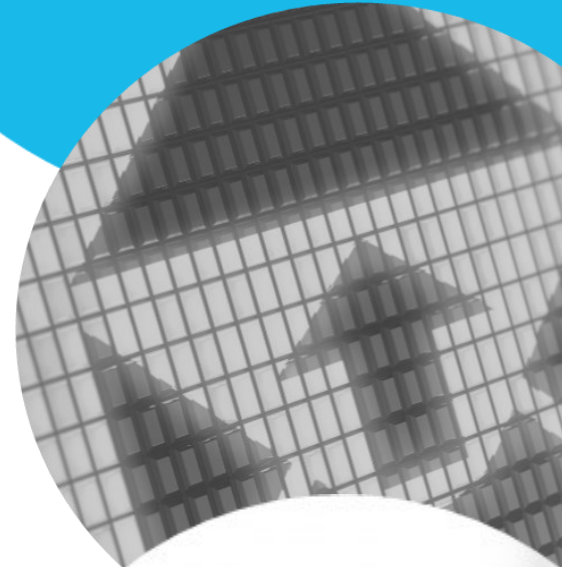

- Seamless connectivity to government, customer & supplier systems
- Integration to virtually any system (ERP, accounting) using any file format
- Detailed real time tracking
- Advanced encryption technology to ensure data integrity & security
- Customized web portal options
- Digital Signatures & Local Soil Archiving
- Highly configurable business intelligence analytics & reporting
- Monitoring and alerting of critical processes 24/7/365
- Suppliers enablement & onboarding services
- Comprehensive business rules, workflow & legal compliance automation

## BENEFITS:

- Complies with government eInvoicing legal requirements
- Reduces invoice handling cost by up to 90%
- Reduces costs associated with user entry errors & dispute resolution
- Improve cash flow & working capital controls
- Reduces or eliminates costs associated with scan & capture
- Provides real time visibility & analytics
- Improves collaborative relationship with suppliers/customers

# XRP E-INVOICING SOLUTION

With B2B, B2C and B2G options, the XRP eInvoicing Solution replaces largely paper-based billing processes for the issuance & exchange of electronic documents.
